SUMMARY

I am a Computer Science Engineering graduate specializing in Artificial Intelligence and Machine Learning, with 6 months of internship experience in software testing. My core expertise lies in manual testing, test case design, defect tracking, and functional and regression testing of web and mobile applications. I also bring knowledge of Python, Java, SQL, and basic Cypress automation, along with hands-on project experience in machine learning and web development. I focus on ensuring software quality, identifying issues, and contributing to reliable, user-friendly digital solutions.

EXPERIENCE

Software Testing Intern | KO Innovation | Jan 2026 – Jun 2026

- Tested web and mobile applications for the Kofleetz fleet management platform.
- Created and executed test cases; performed functional and regression testing.
- Reported and tracked defects in Taiga and collaborated with developers to verify fixes.
- Gained basic Cypress automation experience and validated mobile usability and business workflows.

EDUCATION

2022-26 **Saranathan College of Engineering**
B.E.CSE(With Artificial Intelligence and Machine Learning)

2022 **Saraswathi Vidyalaya Matric.Hr.Sec.School**
Tamil Nadu State Board - 85%

2020 **Saraswathi Vidyalaya Matric.Hr.Sec.School**
Tamil Nadu State Board - 83%

PROJECTS

1. Diabetic Retinopathy Detection | Git link
- Developed a deep learning-based system to detect and classify diabetic retinopathy from retinal images.
- Implemented and evaluated EfficientNet and ResNet models to classify five disease severity levels.
- Explored model performance for automated retinal image classification.

2. Cypress Test Automation — E-commerce Website | Git link
- Developed automated test scripts for e-commerce workflows using Cypress.
- Automated login validation and shopping-related user interactions.
- Practiced test execution, assertions, and debugging to validate application functionality.

3. Breast Cancer Detection Using Machine Learning | Git link
- Built a neural network to classify breast tumors using the Wisconsin Breast Cancer Dataset.
- Performed data preprocessing and model training to support tumor classification.
- Evaluated model predictions to assess classification performance.

TECHNICAL SKILLS

Programming: Python, Java, SQL,JavaScript,HTML,CSS
Testing: Manual, Functional and Regression Testing, Test Case Design, Defect Reporting, UAT, Mobile App Testing
Tools: Cypress, Taiga, MS Excel, MS Word, Git
Soft Skills: Communication,Teamwork & Collabration, Problem Solving, Cirtical Thinking

CERTIFICATES

- Python 101 for Data Science — CERTIFICATE
- Machine Learning with Python — CERTIFICATE
- Python for Data Science — CERTIFICATE
- Data fundamentals — CERTIFICATE
